

Air Core Coils

Variants

- Layer winding
- High-temperature-stable winding
- Tin-plated leads
- Leads with strands, connectors

Wires

- Varnished copper wires
- High temperature
- Aluminum wires (copper-plated)
- Stranded wires

Geometry

- Round, rectangular, oval...
- Single-layer flat coils
- Formed coils
- Stepped windings
- Specialty: windings and winding end outside

Know-how

- Accurate mechanical dimensions
- Wide variety of forms
- Own tool-making shop
- Own machine-building shop for different production methods

Capacity

- 2 million/year

Applications

- Actuators
- Linear drives
- Motors
- Induction heating elements
- Chokes

Packaging

- Typically in cardboard packages

Values specified are typical, but not binding.
